

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1-12. (Canceled)

13. (Currently Amended) A portable, collapsible enclosure, comprising:

a plurality of flexible side panels, each side panel having a frame with at least one foldable supporting element, which, when unfolded, provides rigidity and shape to the side panel; and

at least one strip of flexible material having a hinge section and a plurality of cutout elements, wherein said hinge section is attachable to a portion of at least one of said side panels, and said hinge section is connected to the side panel and a plurality of cutout elements connected to the hinge section wherein the cutout elements are of sizes and shapes that simulate foliage.

14. (Previously Presented) The invention of claim 13, wherein the cutout elements are shaped as leaves.

15. (Previously Presented) The invention of claim 13, wherein the cutout elements are shaped as circles.

16. (Previously Presented) The invention of claim 13, wherein the cutout elements are shaped as polygons.

17. (Previously Presented) The invention of claim 13, wherein the cutout elements have irregular shapes.

18. (Canceled)

19. (Currently Amended) A portable, collapsible enclosure, comprising:

a plurality of flexible side panels, each side panel having a frame with at least one foldable supporting element, which, when unfolded, provides rigidity and shape to the side panel;

at least one strip of flexible material having a hinge section and a plurality of cutout elements, wherein said hinge section is attachable for attachment to at least one of the side panels, and said and a plurality of cutout elements connected to the hinge section wherein the cutout elements are of sizes and shapes that simulate foliage; and

means for removably attaching vegetation to at least one of the side panels.

20. (Previously Presented) The portable, collapsible enclosure of claim 19, wherein the means for removably attaching vegetation to at least one of the side panels are elastic strips.

21. (Previously Presented) The strip of flexible material of claim 19 wherein the cutout elements are shaped as leaves.

22. (Previously Presented) The strip of flexible material of claim 19 wherein the cutout elements are shaped as circles.

23. (Previously Presented) The strip of flexible material of claim 19 wherein the cutout elements are shaped as polygons.

24. (Previously Presented) The strip of flexible material of claim 19 wherein the cutout elements have irregular shapes.

25. (New) A portable, collapsible enclosure, comprising:

    a plurality of flexible side panels, each side panel having a perimeter defined by a sleeve having a foldable supporting element disposed therein, wherein said foldable supporting element provides rigidity and shape to the side panel when unfolded; and

    at least one elongated strip of flexible material having a first edge and an opposing second edge, wherein said first edge is connectable to at least one of said side panels along said sleeve, and said second edge has a plurality of cutout elements defined therein, and said cutout elements are of sizes and shapes that simulate foliage.
